

AI for Mathematics

Discovery · Formalization · Proof

Problem-Specific Modeling

Guiding Human Intuition

(patterns → conjectures)

Constructing Examples & Counterexamples

(RL / search / evolution)

Problem-Specific Formal Reasoning

(closed systems, e.g., geometry)

General-Purpose Modeling

Reasoning

natural language reasoning
formal reasoning
autoformalization
automated theorem proving

Mathematical Information Retrieval

(premises · semantic · question-answer)

Agentic Workflows for Discovery

(LLM + tools orchestration)
